Average period between two moultings: 21 months

Maximal period between two moultings: 25 months

Minimal period between two moultings: 15 months

Number of observations: 26 periods

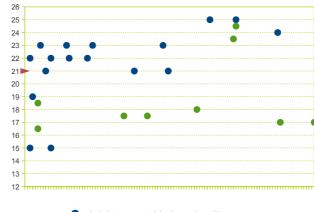

Standard deviation: 3,1 months

Share of periods longer than the average: 50~%

Share of periods equal to the average:  $12 \quad \%$ 

Share of periods shorter than the average:

single between certainly observed moultings

averaged between two observed moultings presumably not in a row

general average

## Calculation without averages

Average period between two moultings: 22 months

Maximal period between two moultings: 25 months

Minimal period between two moultings: 15 months

Number of observations: 17 periods

Standard deviation: 2,9 months

Share of periods longer than the average: 41  $\,\%$ 

Share of periods equal to the average:  $\begin{array}{cc} \text{24} & \% \end{array}$ 

Share of periods shorter than the average:

single between certainly observed moultings

general average

Determined condition of feathers in the following tables:
